

# **Network Appliance Platform**

Hardware Platforms for Network Computing

# NCA-6040 User Manual

Version: 1.4 Date of Release:2023-12-22

### **About this Document**

This manual describes the overview of the various functionalities of this product, and the information you need to get it ready for operation. It is intended for those who are:

- responsible for installing, administering and troubleshooting this system or Information Technology professionals.
- assumed to be qualified in the servicing of computer equipment, such as professional system integrators, or service personnel and technicians.

The latest version of this document can be found on Lanner's official website, available either through the product page or through the Lanner Download Center page with a login account and password.

### **Icon Description**

The icons are used in the manual to serve as an indication of interest topics or important messages.

lcon	Usage
Note or Information	This mark indicates that there is something you should pay special attention to while using the product.
Warning or Important	This mark indicates that there is a caution or warning and it is something that could damage your property or product.

### **Online Resources**

To obtain additional documentation resources and software updates for your system, please visit the Lanner Download Center. As certain categories of documents are only available to users who are logged in, please be registered for a Lanner Account at <u>http://www.lannerinc.com/</u> to access published documents and downloadable resources.

# **Technical Support**

In addition to contacting your distributor or sales representative, you could submit a request at our <u>Lanner</u> <u>Technical Support</u> and fill in a support ticket to our technical support department.

### **Documentation Feedback**

Your feedback is valuable to us, as it will help us continue to provide you with more accurate and relevant documentation. To provide any feedback, comments or to report an error, please email <u>contact@lannerinc.com</u>. Thank you for your time.

### **Copyright and Trademarks**

This document is copyrighted © 2023 by Lanner Electronics Inc. All rights are reserved. The original manufacturer reserves the right to make improvements to the products described in this manual at any time without notice. No part of this manual may be reproduced, copied, translated or transmitted in any form or by any means without the prior written permission of the original manufacturer. Information provided in this manual is intended to be accurate and reliable. However, the original manufacturer assumes no responsibility for its use, nor for any infringements upon the rights of third parties that may result from such use.

### **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### **FCC Caution**

- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
- > This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

- 1. An unshielded-type power cord is required in order to meet FCC emission limits and also to prevent interference to the nearby radio and television reception. It is essential that only the supplied power cord be used.
- 2. Use only shielded cables to connect I/O devices to this equipment.
- **3.** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

# 

- 1. Operations in the 5.15-5.25GHz band are restricted to indoor usage only.
- 2. This device meets all the other requirements specified in Part 15E, Section 15.407 of the FCC Rules.

# **Safety Guidelines**

Follow these guidelines to ensure general safety:

- Keep the chassis area clear and dust-free during and after installation.
- Do not wear loose clothing or jewelry that could get caught in the chassis. Fasten your tie or scarf and roll up your sleeves.
- Wear safety glasses if you are working under any conditions that might be hazardous to your eyes.
- Do not perform any action that creates a potential hazard to people or makes the equipment unsafe.
- Disconnect all power by turning off the power and unplugging the power cord before installing or removing a chassis or working near power supplies
- Do not work alone if potentially hazardous conditions exist.
- Never assume that power is disconnected from a circuit; always check the circuit.

### Consignes de sécurité

Suivez ces consignes pour assurer la sécurité générale :

- Laissez la zone du châssis propre et sans poussière pendant et après l'installation.
- Ne portez pas de vêtements amples ou de bijoux qui pourraient être pris dans le châssis. Attachez votre cravate ou écharpe et remontez vos manches.
- Portez des lunettes de sécurité pour protéger vos yeux.
- N'effectuez aucune action qui pourrait créer un danger pour d'autres ou rendre l'équipement dangereux.
- Coupez complètement l'alimentation en éteignant l'alimentation et en débranchant le cordon d'alimentation avant d'installer ou de retirer un châssis ou de travailler à proximité de sources d'alimentation.
- ► Ne travaillez pas seul si des conditions dangereuses sont présentes.
- Ne considérez jamais que l'alimentation est coupée d'un circuit, vérifiez toujours le circuit. Cet appareil génère, utilise et émet une énergie radiofréquence et, s'il n'est pas installé et utilisé conformément aux instructions des fournisseurs de composants sans fil, il risque de provoquer des interférences dans les communications radio.

### **Lithium Battery Caution**

- There is risk of explosion if the battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.
- Installation should be conducted only by a trained electrician or only by an electrically trained person who knows all installation procedures and device specifications which are to be applied.
- Do not carry the handle of power supplies when moving to another place.
- Please conform to your local laws and regulations regarding safe disposal of lithium battery.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery can result in an explosion.
- Leaving a battery in an extremely high temperature environment can result in an explosion or the leakage of flammable liquid or gas.
- A battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.

### Avertissement concernant la pile au lithium

- Risque d'explosion si la pile est remplacée par une autre d'un mauvais type.
- Jetez les piles usagées conformément aux instructions.
- L'installation doit être effectuée par un électricien formé ou une personne formée à l'électricité connaissant toutes les spécifications d'installation et d'appareil du produit.
- Ne transportez pas l'unité en la tenant par le câble d'alimentation lorsque vous déplacez l'appareil.

# **Operating Safety**

- Electrical equipment generates heat. Ambient air temperature may not be adequate to cool equipment to acceptable operating temperatures without adequate circulation. Be sure that the room in which you choose to operate your system has adequate air circulation.
- Ensure that the chassis cover is secure. The chassis design allows cooling air to circulate effectively. An open chassis permits air leaks, which may interrupt and redirect the flow of cooling air from internal components.
- Electrostatic discharge (ESD) can damage equipment and impair electrical circuitry. ESD damage occurs when electronic components are improperly handled and can result in complete or intermittent failures. Be sure to follow ESD-prevention procedures when removing and replacing components to avoid these problems.
- Wear an ESD-preventive wrist strap, ensuring that it makes good skin contact. If no wrist strap is available, ground

yourself by touching the metal part of the chassis.

 Periodically check the resistance value of the antistatic strap, which should be between 1 and 10 megohms (Mohms).

# Sécurité de fonctionnement

- L'équipement électrique génère de la chaleur. La température ambiante peut ne pas être adéquate pour refroidir l'équipement à une température de fonctionnement acceptable sans circulation adaptée. Vérifiez que votre site propose une circulation d'air adéquate.
- Vérifiez que le couvercle du châssis est bien fixé. La conception du châssis permet à l'air de refroidissement de bien circuler. Un châssis ouvert laisse l'air s'échapper, ce qui peut interrompre et rediriger le flux d'air frais destiné aux composants internes.
- Les décharges électrostatiques (ESD) peuvent endommager l'équipement et gêner les circuits électriques. Des dégâts d'ESD surviennent lorsque des composants électroniques sont mal manipulés et peuvent causer des pannes totales ou intermittentes. Suivez les procédures de prévention d'ESD lors du retrait et du remplacement de composants.
- Portez un bracelet anti-ESD et veillez à ce qu'il soit bien au contact de la peau. Si aucun bracelet n'est disponible, reliez votre corps à la terre en touchant la partie métallique du châssis.
- Vérifiez régulièrement la valeur de résistance du bracelet antistatique, qui doit être comprise entre 1 et 10 mégohms (Mohms).

### **Mounting Installation Precautions**

The following should be put into consideration for rack-mount or similar mounting installations:

- Do not install and/or operate this unit in any place that flammable objects are stored or used in.
- The installation of this product must be performed by trained specialists; otherwise, a non-specialist might create the risk of the system's falling to the ground or other damages.
- Lanner Electronics Inc. shall not be held liable for any losses resulting from insufficient strength for supporting the system or use of inappropriate installation components.
- Elevated Operating Ambient If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (Tma) specified by the manufacturer.
- Reduced Air Flow Installation of the equipment in a rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.
- Mechanical Loading Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- Circuit Overloading Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.
- Reliable Grounding Reliable grounding of rack mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power strips).
- Instruction for the installation of the conductor to building earth by a skilled person.

# **Electrical Safety Instructions**

Before turning on the device, ground the grounding cable of the equipment. Proper grounding (grounding) is very important to protect the equipment against the harmful effects of external noise and to reduce the risk of electrocution in the event of a lightning strike. To uninstall the equipment, disconnect the ground wire after turning off the power. A ground wire (green-and-yellow) is required and the part connecting the conductor must be greater than 6 mm2 or 8AWG.

# Consignes de sécurité électrique

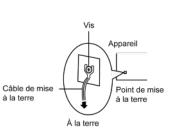

- Avant d'allumer l'appareil, reliez le câble de mise à la terre de l'équipement à la terre.
- Une bonne mise à la terre (connexion à la terre) est très importante pour protéger l'équipement contre les effets néfastes du bruit externe et réduire les risques d'électrocution en cas de foudre.
- Pour désinstaller l'équipement, débranchez le câble de mise à la terre après avoir éteint l'appareil.
- Un câble de mise à la terre est requis et la zone reliant les sections du conducteur doit faire plus de 6 mm2 ou 8 AWG.

### **Grounding Procedure for This Device**

- Connect the grounding cable to the ground.
- The protection device for the DC power source must provide 40A current.
- ▶ This protection device must be connected to the power source before DC power.

### Procédure de mise à la terre l'équipement

- Branchez le câble de mise à la terre à la terre.
- L'appareil de protection pour la source d'alimentation CC doit fournir 40A de courant.
- Cet appareil de protection doit être branché à la source d'alimentation avant l'alimentation CC.

#### Warning

- This equipment must be grounded. The power cord for product should be connected to a socket-outlet with earthing connection.
- Product shall be used with Class 1 laser device modules.
- Suitable for installation in Information Technology Rooms in accordance with Article 645 of the National Electrical Code and NFPA 75.
- The machine can only be used in a restricted access location and be installed and serviced by skilled person.

#### **Avertissement**

- Cet équipement doit être mis à la terre. La fiche d'alimentation doit être connectée à une prise de terre correctement câblée
- ▶ Le produit doit être utilisé avec des modules de dispositifs laser de classe 1.
- Peut être installé dans des salles de matériel de traitement de l'information conformément à l'article 645 du National Electrical Code et à la NFPA 75.
- ► Les matériels sont destinés à être installés dans des EMPLACEMENTS À ACCÈS RESTREINT.

For DC input, this unit is intended to be supplied by an UL listed power source, rated 48V to 60Vdc, 40A min, 60A max, and an altitude operation 5000m min.

 CAUTION: TO DISCONNECT POWER, REMOVE ALL POWER CORDS FROM UNIT. 注意:要斷开电源・请将所有电源线从本机上拔下。 注意:要斷用電源・請將所有電源線從本機上拔下。 WARNUNG: Wenn Sie das Gerät zwecks Wartungsarbeiten vom Netz trennen müssen, müssen Sie beide Netzteile abnehmen. ATTENTION: DÉBRANCHER TOUS LES CORDONS D'ALIMENTATION POUR DÉCONNECTER L'UNITÉ DU SECTEUR.

# **CHAPTER 1: PRODUCT OVERVIEW**

The NCA-6040's specifications and outstanding features deliver maximized packet processing efficiency for virtual network functions, cryptography acceleration (for deep packet inspection) and next-generation firewall and UTM/IPS/IDS.

### **Package Content**

Your package contains the following items:

- 1x Network Security Platform
- ▶ 1x CPU Heatsink, 2x Processor Carrier (1x E1A for XCC CPU Series, 1x E1B for MCC CPU Series)
- ▶ 1x Console Cable, 1x RJ45 LAN Cable, 1x RJ45 Cross-over LAN Cable
- 2x Power Supply Cables
- ▶ 1x Short Ear Rack Mount Kit with screws

### **Ordering Information**

SKU No.	Main Features
	Intel Sapphire Rapid SP, 350W CPU TDP, with BMC Support, 4x System Fans, 8x NCS2
NCA-6040A	Or 4x N2S NIC Modules, Support For FHFL PCIe Card (Under 150W)
	Intel Sapphire Rapid SP, 205W CPU TDP, with BMC Support, 4x System Fans, 8x NCS2 Or
NCA-6040B	4x N2S NIC Modules, Support For FHFL PCIe Card (Under 75W)
	Intel Sapphire Rapid SP, 350W CPU TDP, 4x System Fans, 8x NCS2 Or 4x N2S NIC
NCA-6040C	Modules, Support For FHFL PCIe Card (Under 150W)

### **Optional Accessories**

Model No.	Description
Riser Card Kit	Riser Card Kit for rear side PCIe expansion
NCS2-LCM6210A	A Character LCM Module with Keypad
IAC-TPM04A	TPM 2.0 Module
IAC-AST2600	IPMI (Intelligent Platform Management Interface) Card Module
AC Power Module	1300W AC Power Module Kit
DC Power Module	1600W DC Power Module Kit
Fan Kit	Swappable Fan Kit
Slide Rackmount Rail Kit	Slide Rackmount Rail Kit with screw accessories

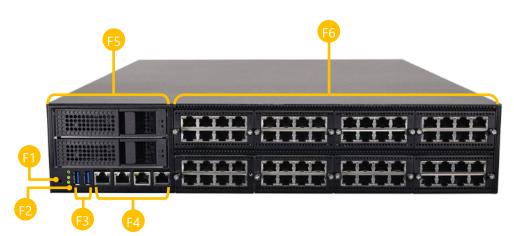

**Note**: If any component is missing or damaged, please contact your dealer immediately for assistance.

# System Specifications

Form Factor		2U 19" Rackmount
	Processor Options	Intel <sup>®</sup> Xeon <sup>®</sup> Processor Scalable Family
	Processor Options	(Sapphire Rapids-SP))
Platform	CPU Socket	1x LGA4677
	Chipset	Intel <sup>®</sup> Emmisburg PCH
	Security Acceleration	Intel <sup>®</sup> QuickAssist Technology (By CPU)
BIOS		AMI SPI Flash BIOS
	Technology	DDR5 4800MHz RDIMM
System Memory	Max. Capacity	768GB
	Socket	12x 288-pin DIMM
	Ethernet Ports	2x 2.5GbE RJ45 w/ LEDs by Intel® i226-LM
Networking	Bypass	N/A
	NIC Module Slot	8x NCS2 or 4x N2S NIC Module Slots
LOM	IO Interface	1x RJ45 LOM Port (via BMC Chip) (By SKU)
	OPMA slot	Yes, Support AST2600 IPMI Card (By SKU)
	Reset Button	1x Reset Button
	LED Indicators	Power/Status/Storage LED Indicators
	Power Button	1x ATX Power Switch
I/O Interface	Console Port	1x RJ45 Console Port;
	USB Port	2x USB 3.0 Ports
	Display Port	1x VGA Port via AST2600 IPMI Card (By SKU)
	Power Input	AC Power Inlet on PSU
	HDD/SSD Support	2x 3.5" or 2x 2.5" HDD/SSD Swappable Bays
Storage	Onboard Slots	1x M.2 2280 B+M Key for SATA;
	Onboard Slots	2x M.2 2280 M-Key for NVMe (PCle)
Expansion	PCle	1x PCI-E*8 FH/FL (Optional)
	mini-PCIe	N/A
	Watchdog	YES
Miscellaneous	Internal RTC with Li Battery	YES
	TPM	YES, Support IAC-TPM04 (Optional)
Cooling	Processor	Passive CPU heat sink
	System	4x Swappable Smart Cooling Fans
	Temperature	0~40°C Operating
Environmental Parameters	remperature	-40~70°C Non-Operating
	Humidity (RH)	5~90% Operating
	-	5~ 95% Non-Operating
System Dimensions	(WxDxH)	438 x 660 x 88 mm
	Weight	24 kg
Package Dimensions	(WxDxH)	827 x 588 x 303mm
-	Weight	26 kg
Power	Type/Watts	2x 1300W CRPS AC PSU (Default);
Approvals and Compliance		RoHS, CE/FCC Class A, UKCA, UL

# **Front Panel**

No.		Description
F1	Reset Button	Software reset
F2	LED Indicators	System Power System Status HDD Activity
F3	USB Ports	2x USB 3.0 Ports
F4	RJ45 Ports	Console Port LOM Port 2.5GbE RJ45 LAN Port
F5	HDD/SSD Tray	2x 3.5" or 2x 2.5" HDD/SSD Tray
F6	NIC Module	8x NCS2 Slim Type or 4x N2S NIC module

**Note**: Please refer to Appendix A: LED Indicator Explanations for descriptions of the LED Indicators (including those on MGMT Port, IPMI Port, GbE, SFP+ Ports and HDD trays)

# **Rear Panel**

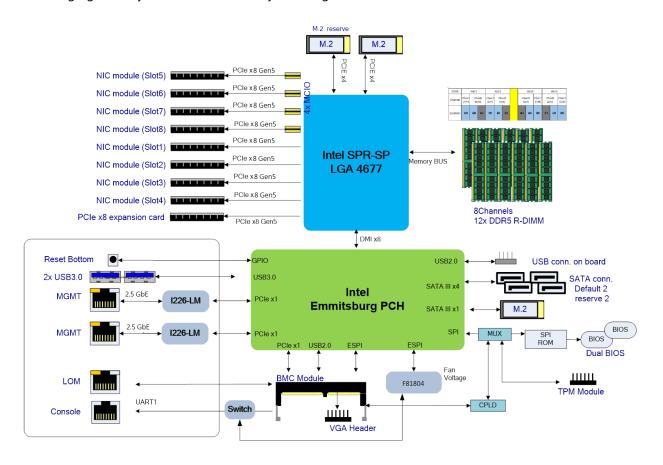

No.	Description	
R1	Rear PCIe Expansion	1x PCIe expansion slot (Optional)
R2	Power Switch	1x Power Button
R3	Fans	4x Swappable Smart Fans
R4	Power Supply	2x 1300W Redundant (N+1 Design) PSU

# **CHAPTER 2: MOTHERBOARD INFORMATION**

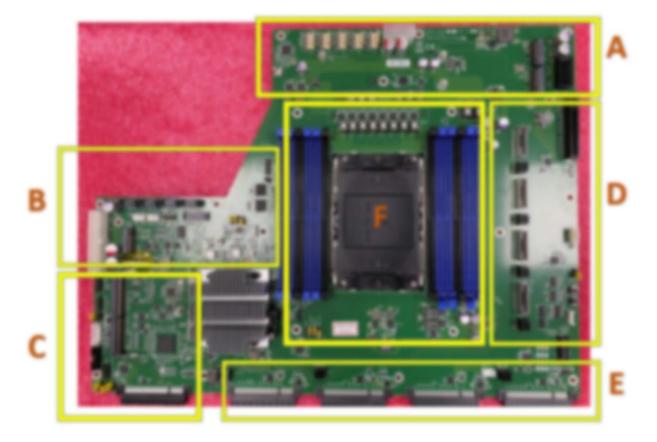

### **Block Diagram**

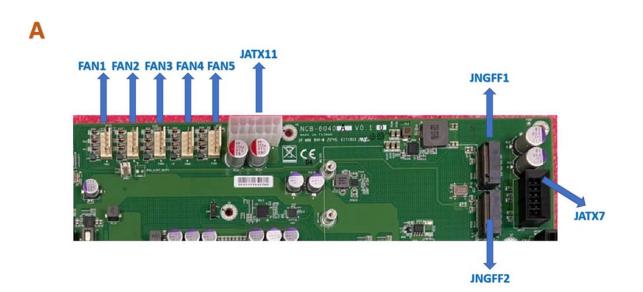

The block diagram indicates how data flows among components on the motherboard. Please refer to the following figure for your motherboard's layout design.

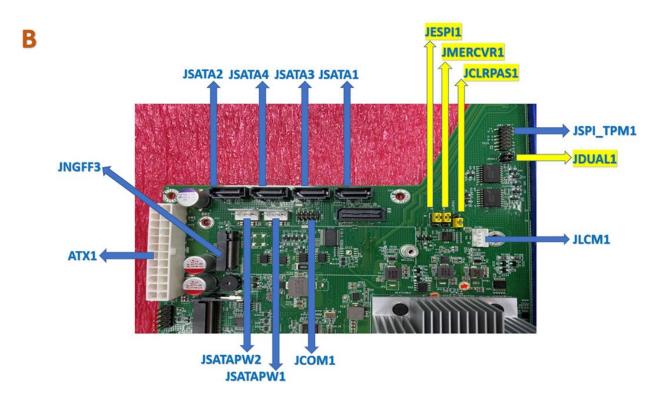

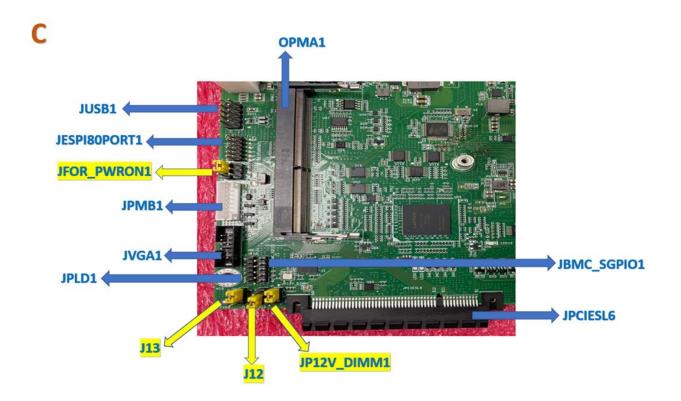

### **Internal Jumpers and Connectors**

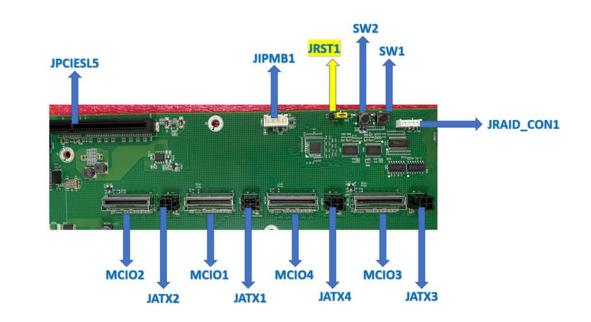

The pin headers on the motherboard are often associated with important functions. With the shunt (Jumper) pushed down on the designated pins (the pin numbers are printed on the circuit board, surrounding the pin header), certain feature can be enabled or disabled. While changing the jumpers, make sure your system is turned off.

# **CHAPTER 3: HARDWARE SETUP**

To reduce the risk of personal injury, electric shock, or damage to the system, please <u>remove all power</u> <u>connections to completely shut down the device</u>. Also, please <u>wear ESD protection gloves when conducting</u> <u>the steps</u> in this chapter.

### **Opening the Chassis**

1. Loosen the two (2) thumb screws from the rear panel.

2. Gently pull the cover backwards slightly.

3. Lift the cover up to remove.

### **Installing the CPU**

Please note that the system delivered to you includes the heatsink and processor. This processor comes with a rather sophisticated design, therefore, the assembly of which must be handled with exclusive tools and extreme care by professionals.

Installing the processor onto the motherboard involves three stages:

- **1.** Processor carrier assembly
- 2. Processor carrier assembly to heatsink.
- 3. System assembly PHM (Processor + Heat Sink Module) to motherboard

### **Tools Required**

Tool	Description								
T-30 Torx Bit <sup>©</sup>	Set to 0.904 N.m. (or 8 in/lbf $\pm$ 10%) for tightening the nuts which fasten the PHM on the bolster plate.	T-30 Torx* Bit							
<b>ESD Protection</b> (ESD gloves, ESD-safe work surface, ESD-safe shoes, grounded wrist strap etc.)	During the entire assembly process, at least wear a pair of ESD gloves to avoid damaging or contaminating the electronic parts while enhancing your own safety.								

use might differ.

### **Parts Explanation:**

ltem	Description											
Processor	Please avoid touching the gold fingers or package lands of the processor even if you are wearing ESD gloves.	Do not touch package lands										

Heatsink (1U & 2U)	When handling heatsink, always grip it along the axis of the fins of the heatsink to avoid fin damage. Fins or soldering of fins might be damaged by handling heatsink holding along the long side of the heatsink.									
Processor Carrier										
Processor Tray										

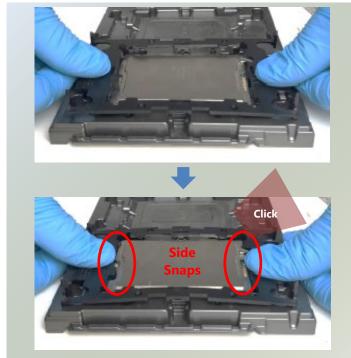

### **Processor Carrier Assembly**

1. Place the processor carrier on top of the processor that is in the package tray aligning **Pin 1** marks on the processor carrier to **Pin 1** of the processor.

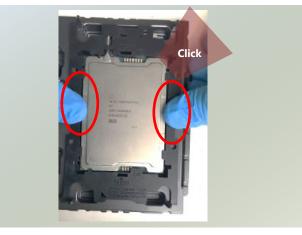

Note: Make sure that the keying feature tabs of the processor carrier are aligned to the slots in the processor properly. If not check that the correct processor carrier is being used.

2. Using both hands place the thumbs on the side of the carrier at the opposite end of the TIM brake lever. Push down on one side at a time slightly pressing in the outward motion until a snap sound is heard.

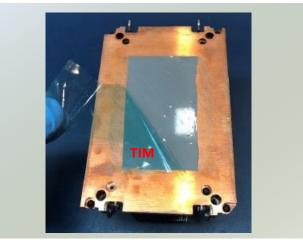

3. Check the two side snap latches on the carrier and verify that they have latched to the package. If not then press down on top of the side snap latches until they snap into place.

### **Processor Carrier Assembly to Heatsink**

1. If there is TIM (Thermal Interface Material) protective film on the base of heatsink, remove it.

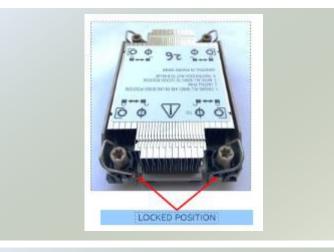

2. Turn the heatsink over and set the Anti-Tilt wires to the locked position (outward position).

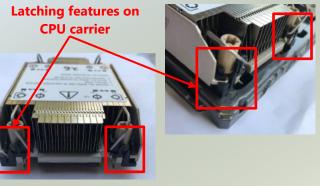

3. Align Pin 1 indicator of Processor carrier and corner cut out of Heatsink. If there are two corners cut out, either orientation is fine.

 Place the heatsink ensure latching features on Processor carrier and heatsink are aligned during assembly.

5. Press heatsink down firmly to engage carrier latching features to the heatsink at four corners.

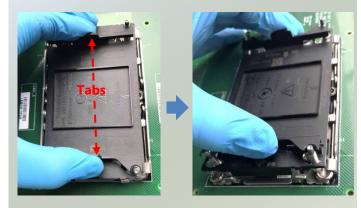

6. If carrier latching features do not latch the heatsink properly, engage each latching feature by pressing the heatsink at the unlatched corner. You may hear a clicking sound when latched.

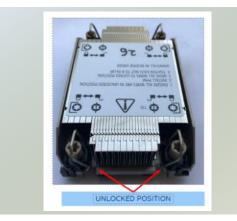

### System Assembly PHM to Motherboard

 Locate the processor placement on the motherboard. Hold finger grips on socket cover and squeeze in on the grip tabs. Then pull the cover up and off vertically to remove.

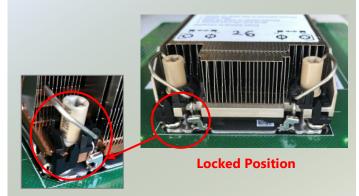

2. Set each anti-tilt wire to inward or unlocked position on the heatsink.

 Lift up the PHM. Turn the PHM over to locate the PIN1 corner on processor carrier and processor.

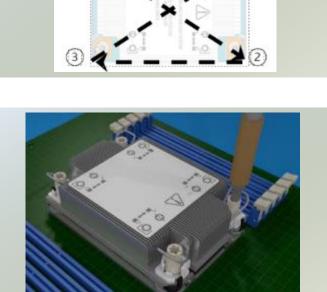

- Then turn the PHM right side up. Line up the PIN1 corner of the PHM to the bolster plate PIN1 corner. Lower the PHM vertically down over the bolster plate studs.
- 5. Set all four Anti-Tilt wires into the locked position (outward position.)

(2

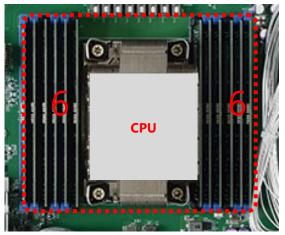

6. Next is to tighten the nuts on the heatsink using a diagonal pattern tightening sequence. Diagonal sequence is regardless of starting point. Primary step is Second nut driven is in diagonally opposite corner to the First nut.

7. Tighten all nuts on heatsink using a torque driver with a T30 bit to 8 in-lbf ± 10%.

### **Installing the System Memory**

The motherboard supports DDR5 registered DIMM memory for heavy-duty operations. Please follow the steps below to install the DIMM memory modules. The CPU have 12 DIMM sockets (6 on each sides)

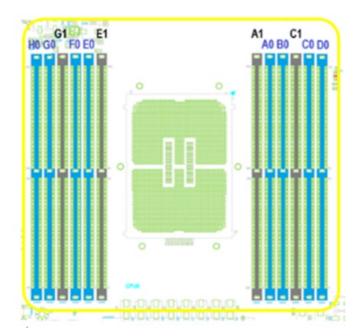

- Supported Capacities: 8/16/32/64 GB
- Maximum RAM: **768GB** (64GB per slot)

#### **DIMM Population Guidelines**

Please do follow the memory module installation instructions to install the DIMM, and make sure the DIMM population guidelines are met:

- Each CPU requires at least 1 memory module to boot and run from.
- If you do not plan to fill up all the sockets with 20 memory modules, <u>always start with the blue ones</u> for optimal performance.
- Try to split the DIMMs evenly across the CPUs.
- Please use memory modules of the same capacity, speed and from the same manufacturer to avoid compatibility issues.

#### Sapphire Rapids DDR5 Only DIMM Configurations Diagram

#### **Memory Module Installation Instructions**

Please follow the steps below to install the DIMM memory modules.

- **1.** Power off the system.
- 2. Pull open the DIMM slot latches.

**3.** Align the notch of the DIMM module with the socket key in the slot.

**4.** Insert the module into the slot until it is firmly seated.

# **Installing TPM Module (Optional)**

The system provides one slot for a TPM module card to provide hardware-based security related functions. Follow the steps below for installations.

- 1. Power off the system and open the chassis cover.
- 2. Locate the TPM connector pins on the motherboard.

 Insert the TPM module pins with the connector pins, until the module card is firmly seated.

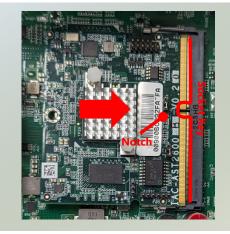

### **Installing IPMI Card**

The system provides one IPMI slot for remote monitoring expansion. Follow the procedure below for installation.

- 1. Power off the system and open the chassis cover.
- 2. Locate the IPMI socket on the motherboard.

- 3. Align the notch of the IPMI card with the socket key in the slot.
- 4. Insert at 30 degrees into the socket until it is fully seated in the connector.

5. Push down on the IPMI card and secure it with one (1) screw.

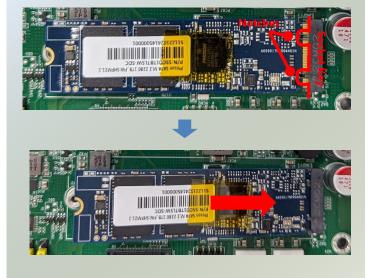

### Installing M.2 SATA Storage (Optional)

NCA-6040 supports one M.2 slot for additional SATA storage expansion. Please follow the steps for installation

- 1. Power off the system and open the chassis cover.
- 2. Locate the M.2 slot on the motherboard.

- 3. Align the notches of the M.2 storage module with the socket key in the pin slot.
- 4. Insert the module at 30 degrees into the socket until it is fully seated.

5. Push down on the module and secure it with a screw

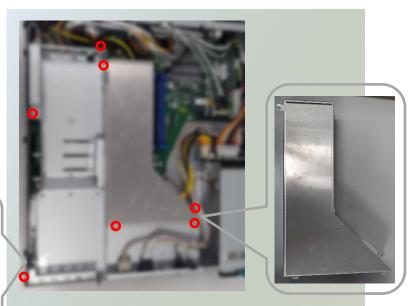

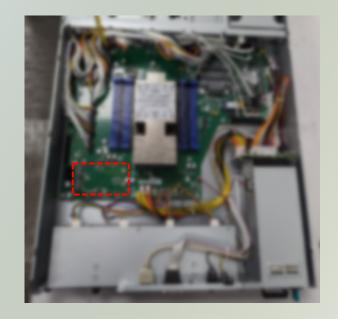

### Installing M.2 SSD Storage (Optional)

NCA-6040 supports two M.2 slot for additional NVMe storage expansion. Please follow the steps for installation.

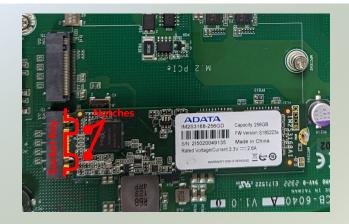

- 1. Power off the system and open the chassis cover.
- Unscrew the seven (7) screws of the fan hood/shroud and PCIe bracket cover on the rear panel. Lift up the fan hood/shroud and PCIe slot bracket cover. Locate the two M.2 slots on the motherboard.

3. Align the notch of the M.2 storage module with the socket key in the pin slot.

- 4. Insert the M.2 storage module at 30 degrees into the socket until it is fully seated.
- 5. Push down on the module and secure with a screw.

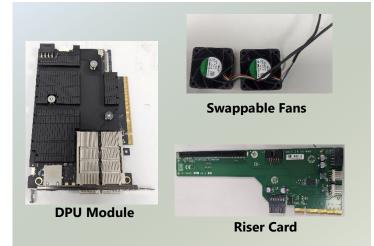

6. Repeat steps if installing a second storage module.

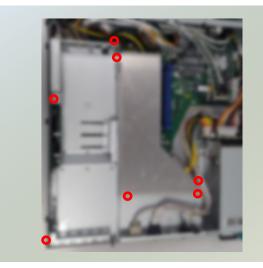

# **Installing DPU Expansion Card (Optional)**

NCA-6040 supports one PCIe x8 FH/FL slot for DPU card expansion. The DPU card requires a rather complex installation process; therefore, the assembly must be handled with care. Please read through the instructions in this section to make sure you have acquired the necessary knowledge and comply with the requirements.

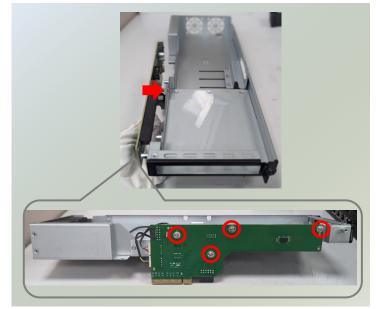

- 1. The DPU Expansion Kit will include:
- 1x DPU Module
- ▶ 1x Riser Card
- 2x Swappable Fans
- Screw packet

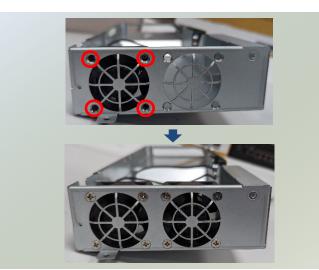

- 2. Power off the system and open the chassis cover.
- 3. Unscrew the seven (7) screws of the fan hood/shroud and PCIe bracket cover, on the rear panel. Lift up the fan hood/shroud and PCIe slot bracket cover.

4. Pick up the PCIe bracket, and the Riser card. Place the Riser card on the side of the bracket and secure with four (4) screws.

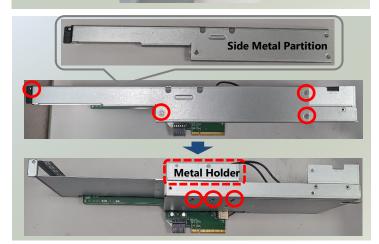

5. Next, we install the fans to the PCIe bracket. Secure the fan with four (4) screws each.

6. Then, connect the fan power cables to the Riser Card.

7. Pick up the PCle bracket, unscrew the four (4) screws on the side to remove the side metal partition. And unscrew the three (3) screws to remove the metal holder.

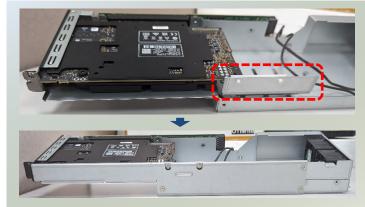

8. Align the DPU module to the PCIe socket. Slide the DPU module into the PCIe socket until it is completed seated.

Make sure the side bar slides in properly (as pictured below).

着りりつ

9. Place the metal holder on the side of the DPU module, and secure with the original three (3) screws. Then place the metal partition back in place and secure with the original four (4) screws.

 Align the socket key of the Riser Card to the socket key on the motherboard.
 Gently insert until it is firmly seated. Then, secure the PCIe bracket with the original three (3) screws.

11. Lastly, insert the DPU power cable to the DPU module. The fan hood/shroud can also be secured back on the motherboard.

### Installing the Disk Drive(s)

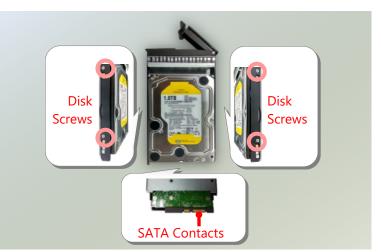

NCA-6040 is built with two 3.5" or 2.5" HDD/SSD slot drive bay. Please follow the steps for installation.

1. Power off the system. Locate the 3.5" disk bay on the front panel.

- 2. To remove the tray, push down on the tab for the tab lever to slide open, and then hold the tab lever to pull out the tray.
- 3. Slide one 3.5"/2.5" HDD/SSD into the tray, and secure with two (2) screws on each side. Make sure the disk SATA contacts are facing outwards.

4. Place the mounted disk tray back into position in the system. Gently push the tray until it is firmly seated and press the tab lever until it clicks into place.

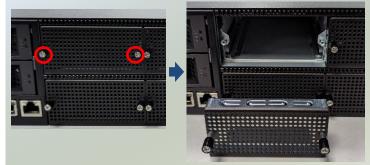

# **Installing the NIC Modules**

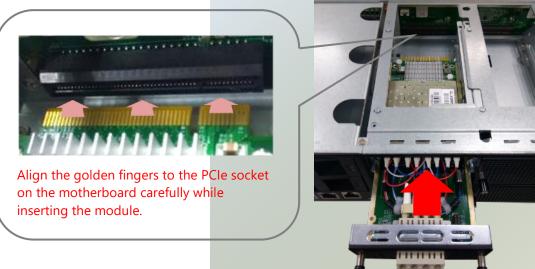

NCA-6040 comes with 8 NIC Ethernet module slots for network bandwidth expansion. Please follow the steps for installation.

- 1. On the front panel, select a NIC Module slot.
- 2. Rotate clockwise and loosen the two lock-screws to remove the door.

3. Insert a NIC module.

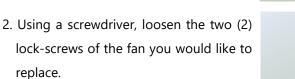

4. Once the module is firmly seated, rotate counter-clockwise and tighten the two lock-screws.

## **Replacing the Cooling Fans**

Cooling fans may wear down eventually. Please refer to the steps below for replacing cooling fans. When using a new cooling fan, simply reverse the steps to install the fan back onto the enclosure and the system.

1. Locate the cooling fans at the rear panel.

3. Hold onto the two lock-screws and pull it out.

4. Insert a new fan. Push the fan unit in until it clicks into place and secure with the two (2) lock-screws.

# **Replacing the Power Supply Units**

Power supply units may wear down eventually. Please be noted that NCA-6040 series supports 1300W PSU. Please prepare the power supply units matching this capacity.

 On the rear panel, locate the power supply units and disconnect the power cords.

2. Press and hold the handle to pull out the power supply unit.

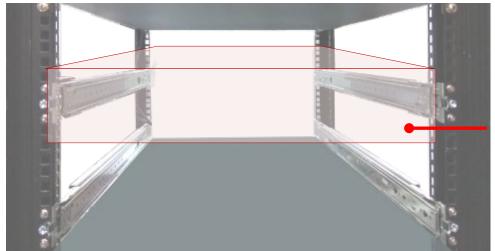

## **Mounting the System**

The system can be installed in a rack using the Slide Rail Kit (optional), sold separately, plus Short Mounting Ear brackets (optional). This method is rather complicated, but the slidable rails allow you to access the system easily while solidly securing the system in the rack. Please follow the steps below for installation.

The Slide Rail Kit can secure the system while providing sufficient weight support for the device.

- Check the package contents of the Slide Rail Kit. The kit shall include the following items:
  - ▶ #1 pack of 12pcs <u>M4x4</u> screws
  - ▶ #2 pack of 2pcs <u>M4x4</u> screws
  - 2x Slide Rails

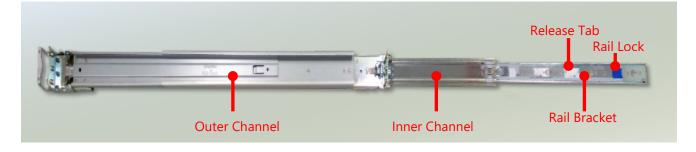

#2 Screw Pack

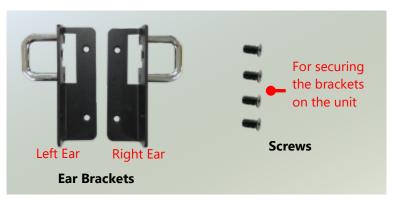

The rail consists of the following parts:

#### Assembling the Ear Brackets

- Check the package contents. The supplied mounting kit shall include the items below:
- > 2x Standard Ear Brackets
- 1x pack of screws
- Install the ear brackets on both sides of the system using the provided screws, two (2) screws on each side.

#### **Attaching the Rail Brackets**

- Unpack a slide rail and slide the inner channel all the way to the end.
- Remove the rail bracket from the inner channel by pushing the Release Tab on the rail bracket outwards while sliding it out. Stretch the rail bracket to the fullest.
- 3. Attach six (6) screws on each side of the system.

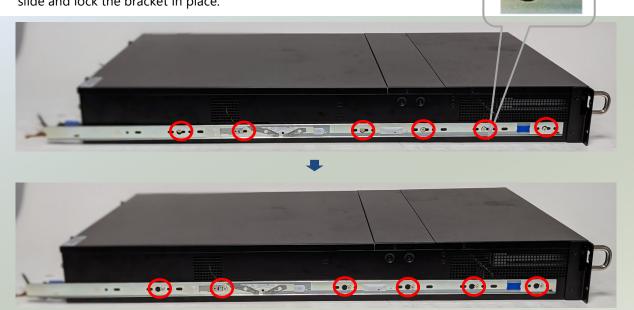

4. Align the **rail bracket** keyholes to the six(6) screws on the side of the system. Thenslide and lock the bracket in place.

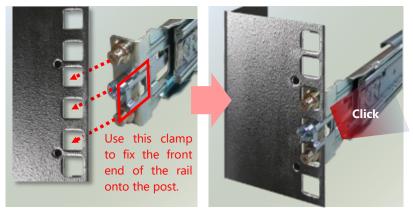

5. Last step, screw in the one (1) screw (from #2 Screw Pack) on each side to secure the rail bracket to the system.

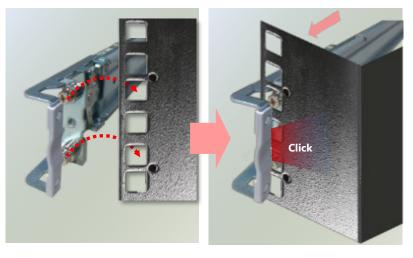

#### **Installing the Slide Rails**

Next, you shall install the slide rail assemblies onto the rack.

 This slide-rails does NOT require screw-fixing. Simply aim at three (3) available screw holes on the rack front and snap the rail (outer channel) front into the rack post, as shown in the image below. You should hear a "click" sound once it is firmly attached.

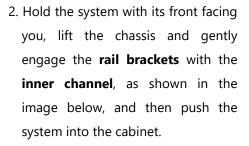

2. For the rear rack installation, slide the rail (outer channel) to aim and engage the bolts on the rail's rear end with the two (2) available holes on the post, and the rail assembly will click into place.

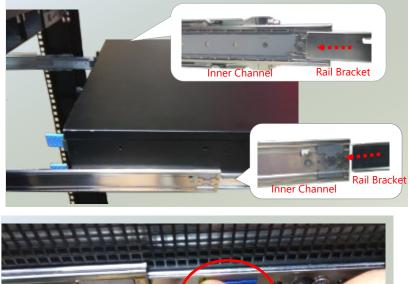

#### Installing the System into the Rack

 Stretch both of the inner channel out to their fullest extent. You will hear a click sound when they are fully stretched and locked.

 When pushing in the system, please also push and hold the Rail Lock tab on both brackets.

Rail Lock

4. The system has completed installation in the rack.

#### Removing the System from the Rack

1. To remove the system from the rack, gently pull it outwards towards you, while pushing the Release Tab on both sides of the **rail brackets**.

# CHAPTER 4: REMOTE SERVER MANAGEMENT (SKU A/SKU B)

# **BMC Overview**

This document specifies the BMC firmware features. The BMC firmware implements IPMI 2.0 based on ASPEED service processor. It performs all the BMC management tasks defined by IPMI 2.0.

In addition, BMC firmware runs an embedded web-server for full configuration using Web UI, which has a low learning curve.

# **BMC Main Features**

Feature		Description
	System Interface support	<ul><li>KCS (System Interface Support)</li><li>LAN (RMCP+)</li></ul>
	IPMI 2.0 based Management	• BMC stack with an IPMI 2.0 implementation
IPMI 2.0	System Management	<ul> <li>Sensor monitoring</li> <li>System power management</li> <li>Watchdog timer</li> <li>Fan speed monitor</li> </ul>
<b>Standard Features</b>		FRU information
	Event Log	System Event Log (SEL)
	Text Console Redirection: SOL	<ul> <li>Support in IPMI stack for SOL to remotely access BIOS and text console before OS booting</li> </ul>
	User Management	<ul><li>IPMI based user management</li><li>Multiple user permission level</li></ul>
	Web User Interfaces	<ul><li>BMC management via web user interface</li><li>Integrated KVM and Virtual Media</li></ul>
Non-IPMI functions	User authorization	<ul><li> RADIUS support</li><li> LDAP support</li></ul>
	Security	SSL and HTTPS support
	Maintenance	<ul> <li>Auto-sync time with NTP server</li> <li>Remote firmware update by Web UI or Linux tool</li> </ul>

### **Firmware Functional Description**

#### System health monitoring

The BMC implements system sensor monitoring feature. It could monitor voltage, temperature and current of critical components.

#### **System Power Management**

The BMC implements chassis power and reset functions for system administrators to control and manage the system power behavior. These functions can be activated by sending the IPMI 2.0 compatible chassis commands to the BMC over messaging interfaces. The following list summaries the supported functions.

- Chassis power on
- Chassis power off
- Chassis power cycle
- Chassis power reset
- Chassis power soft
- Server's power status report

#### Watchdog Timer

The BMC provides an IPMI 2.0 compatible watchdog timer which can prevent the system from system hanging.

#### Field Replaceable Unit (FRU)

The BMC implements an interface for logical FRU inventory devices as specified in IPMI 2.0 specification. This functionality provides commands for system administrators to access and management the FRU inventory information.

#### System Event Log (SEL)

A non-volatile storage space is allocated to store system events for system status tracking.

#### Serial over LAN (SOL)

IPMI 2.0 SOL is implemented to redirect the system serial controller traffic over an IPMI session. System administrators can establish a SOL connection with a standard IPMI client, like IPMITOOL, to remotely interact with serial text-based interfaces such as OS command-line and serial redirected BIOS interfaces.

#### **User Management**

The BMC supports 9 IDs for IPMI user accounts. The maximum length of the username and password are 16 and 20 respectively, and the possible privilege levels are Callback, User, Operator, and Administrator. Moreover, the account creator can enable/disable the user account at any time. If not specified, the default user accounts are listed follows:

User Name	Password	User Access	Characteristics
admin	admin	Enabled	Password can be changed

#### Keyboard, Video, Mouse (KVM) Redirection

- The BMC provides keyboard, video, and mouse (KVM) redirection over LAN. This application is available remotely from the embedded web server.
- Support video recording, recorded videos to be downloaded & playable.

#### **Virtual Media Redirection**

- The BMC provides remote virtual CD, HD and FD redirection. CD image could be mounted directly in KVM window. HD, FD could be mounted by NFS and SAMBA.
- Efficient USB 2.0 based CD/DVD redirection with a typical speed of 20XCD.
- Completely secured transmission.

# **IPMI Commands Support List**

COMMANDS	NETFN	CMD
IPM Device "Global" Commands	I	
Get Device ID	APP (06h)	00h

# **Using BMC Web UI**

In the address bar of your Internet browser, input the IP address of the remote server to access the BMC interface of that server.

Initial access of BMC prompts you to enter the User Name and Password. A screenshot of the login screen is given below:

BMC Management	
	Lisername
	Password
	Login

Login Page

- **Username**: Enter your username in this field.
- **Password**: Enter your password in this field.
- **Sign me in**: After entering the required credentials, click the **Sign me in** to log in to Web UI.

Note: (1) If not specified, the default IP to access BMC is <u>https://192.168.0.100</u>.(2) Please use **https** to access Web UI.

### **Default User Name and Password**

- **Username:** admin
- **Password**: admin

The default username and password are in lower-case characters. When you log in using the default username and password, you will get full administrative rights, and it will ask you to change the default password once you log in. The dialog is shown below:

Change the password for the default user. The password must contain 8
to 16 characters.
Password must follow these rules:
1. Cannot contain all of the user's account name.
2. Includes three of the following four categories:
a. English uppercase characters.
b. English lowercase characters.
c. Numbers 0 to 9.
d. Non-alphanumeric characters (~!@#\$%^&*).
ОК

Change the default password - Dialog

Clicking **OK** will take you to set a password.

	0
BMC Management	New password
	Confirm password
	Submit

Change the default password – Set password

Note: Duplicate usernames shouldn't exist across various authentication methods like LDAP, RADIUS
 or IPMI since the privilege of one Authentication method is overwritten by another authentication method during logging in, and hence the correct privilege cannot be returned properly.

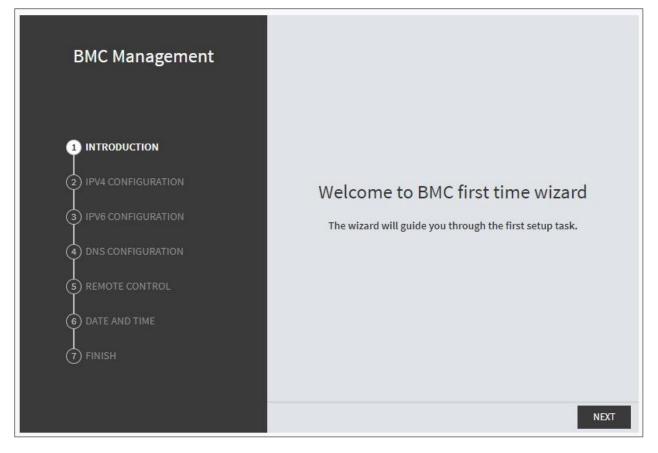

### **First Time Wizard**

After the first-time login, you will see first time wizard welcome page as the following picture. Please press the "Next" button and configure your BMC step by step.

On the "IPv4", "IPv6" and "DNS" pages, you could specify the hostname and network settings of BMC.

On the "Remote Control" page, you could specify allowed IP region which could access KVM and Remote media web pages.

On the "Date and Time" page, you could specify the NTP and time settings.

In the final page, please press "Finish" button to complete the first-time wizard. BMC will be rebooted and apply new settings. You could reconnect to the Web UI after a few minutes.

### Web UI Layout

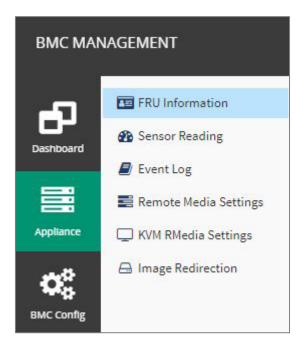

The BMC Web UI consists of various menu items:

### Menu Bar

The menu bar displays the following:

- Dashboard
- ► Appliance FRU Information
- Appliance Sensor Reading
- ► Appliance Event Log
- Appliance Remote Media Settings
- Appliance KVM RMedia Settings
- Appliance Image Redirection
- BMC Config Date and Time
- BMC Config User Configuration User List
- BMC Config User Configuration RADIUS Setup
- BMC Config User Configuration LDAP Setup
- BMC Config User Configuration LDAP Groups
- BMC Config User Configuration Login Block Settings
- BMC Config Network Configuration IP Settings
- BMC Config Network Configuration DNS Settings
- BMC Config Network Configuration Link Settings
- ▶ BMC Config Network Configuration SSL Certificate
- BMC Config Network Configuration Services
- BMC Config Network Configuration Remote Syslog
- BMC Config Audit Log
- BMC Config Maintenance Firmware Update
- BMC Config Maintenance Restore Factory Defaults
- BMC Config Maintenance Preserve Configuration

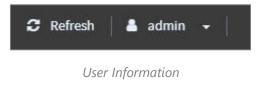

A screenshot of the menu bar is shown below:

Menu Bar

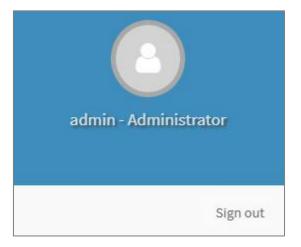

## **Quick Button and Logged-in User**

The user information and quick buttons are located at the top right of the Web UI.

**Logged-in user information:** Click the icon **admin** to view the logged-in user information.

A screenshot of the logged-in user information is shown below:

Logged-in User Information

The logged-in user information shows the logged-in user's username, privilege, with the quick buttons allowing you to perform the following functions:

- ► **Refresh**: Click the icon C Refresh to reload the current page.
- ► **Sign out**: Click the icon <sub>Sign out</sub> to log out of the Web UI.

## Logged-in user and its privilege level

This option shows the logged-in username and privilege. There are four kinds of privileges:

- User: Only valid commands are allowed.
- Operator: All BMC commands are allowed except for the configuration commands that can change the behavior of the out-of-hand interfaces.
- Administrator: All BMC commands are allowed.
- ▶ No Access: Login access denied.

# Help

**Help:** The **Help** icon <sup>(2)</sup> is located at the top right of each page in Web UI. Click this help icon to view more detailed field descriptions.

# **CHAPTER 5: BIOS SETUP**

The system has AMI BIOS built-in, with a SETUP utility that allows users to configure required settings or to activate certain system features. Pressing the <Tab> or <DEL> key immediately allows you to enter the Setup Utility.

# **Enter BIOS Setup**

To enter the BIOS setup utility, simply follow the steps below:

- 1. Boot up the system.
- Pressing the <Tab> or <Del> key immediately allows you to enter the Setup utility, then you will be directed to the BIOS main screen. The instructions for BIOS navigations are as below:

Control Keys	Description
→←	select a setup screen
$\wedge \downarrow$	select an item/option on a setup screen
<enter></enter>	select an item/option or enter a sub-menu
+/-	adjust values for the selected setup item/option
F1	display General Help screen
F2	retrieve previous values, such as the last configured parameters during the last
12	time you entered BIOS
F3	load optimized default values
F4	save configurations and exit BIOS
<esc></esc>	exit the current screen

### **Main Page**

Setup Main Page contains BIOS information and project version information.

		F1: General Help
		F2: Previous Values
		F3: Optimized Defaults
		F4: Save & Exit
		ESC: Exit

Version 2.22.1287 Copyright (C) 2023 AMI

Feature	Option	Description
Above 4G Decoding	Enabled Disabled	Enables or disables 64bit capable Devices to be Decoded in Above 4G Address Space (Only if System Supports 64 bit PCI Decoding)
SR-IOV Support	Disabled Enabled	If the system has SR-IOV capable PCIe Devices, this option enables or disables Single Root IO Virtualization Support.

## **USB Configuration**

Advanced	Aptio Setup - AMI	
USB Module Version	32	<pre>^  Maximum time the device</pre>
		+ will take before it
USB Controllers:		* properly reports itself
1 XHCI		* to the Host Controller.
USB Devices:		* 'Auto' uses default
None		* value: for a Root port
		* it is 100 ms, for a Hub
Legacy USB Support	[Enabled]	* port the delay is taken
XHCI Hand-off	[Enabled]	*
USB Mass Storage	[Enabled]	*
Driver Support		*  ><: Select Screen
Port 60/64 Emulation	[Enabled]	* ^v: Select Item
		* Enter: Select
USB hardware delays		*  +/-: Change Opt.
and time-outs:		* F1: General Help
USB transfer time-out	[20 sec]	+ F2: Previous Values
Device reset time-out	[20 sec]	+ F3: Optimized Defaults
		v F4: Save & Exit
		ESC: Exit
Voucio	n 2 22 1289 Convright (C	

Feature	Option	Description
Legacy USB Support	Enabled Disabled Auto	Enables Legacy USB support. <b>Auto</b> option disables legacy support if no USB devices are connected; <b>Disabled</b> option will keep USB devices available only for EFI applications.
XHCI Hand-off	Enabled Disabled	This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enabled Disabled	Enables or disables USB Mass Storage Driver Support.
USB transfer time-out	1 sec 5 sec 10 sec <mark>20 sec</mark>	The time-out value for Control, Bulk, and Interrupt transfers
Device reset time-out	1 sec 5 sec 10 sec 20 sec	USB mass storage device Start Unit command time-out
Device power-up delay	<mark>Auto</mark> Manual	Maximum time the device will take before it properly reports itself to the Host Controller. <b>Auto</b> uses default value: for a Root port, it is 100 ms, for a Hub port the delay is taken from Hub descriptor.

## **Network Stack Redirection**

ltem	Option	Description
Setup Prompt Timeout	5	The Number of seconds to wait for setup activation key. 65535 means indefinite waiting.
BootupNumLock State	<mark>On</mark> Off	Select the keyboard NumLock state.
Quiet Boot	Disabled Enabled	Enables or disables Quiet Boot option.

• Choose boot priority from boot option group.

• Choose specific boot device priority sequence from available Group device.

## **Save and Exit Setup**

Select the Save and Exit menu item from the BIOS setup screen to enter the Save and Exit Setup screen. Users can select any of the items in the left frame of the screen.

Aptio Setup - AMI < Security Boot Save & Exit	
/ Save Options Discard Changes and Exit Save Changes and Reset Default Options Restore Defaults Boot Override	-+
UEFI: ADATA USB Flash Drive 1100, Partition 1	
	<pre>&gt;&lt;: Select Screen  </pre>
	^v: Select Item    Enter: Select
	+/-: Change Opt.
	F1: General Help    F2: Previous Values
1	F3: Optimized Defaults
1	F4: Save & Exit
	ESC: Exit
Version 2.22.1285 Copyright (C)	2022 AMI
	AB

### Discard Changes and Exit

Select this option to quit Setup without saving any modifications to the system configuration. The following window will appear after the "Discard Changes and Exit" option is selected. Select "Yes" to discard changes and Exit Setup.

#### Save Changes and Reset

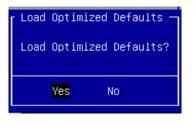

When Users have completed the system configuration changes, select this option to save the changes and reset from BIOS Setup in order for the new system configuration parameters to take effect. The following window will appear after selecting the "Save Changes and Reset" option is selected. Select "Yes" to Save Changes and reset.

Chapter 5: BIOS Setup

### Restore Defaults

Restore default values for all setup options. Select "Yes" to load Optimized defaults.

Note: The items under Boot Override may not be the same images as above, as it would depend on the actual devices connected to the system.

# **APPENDIX A: LED INDICATOR EXPLANATIONS**

The status explanations of LED indicators on Front Panel are as follows:

#### System Power

Solid Green	The system is powered on
Off	The system is powered off

### System Status

This LED indicator is <u>programmable</u>. You could program it to display the operating status of the behaviors described below:

Solid Green	Defined by GPIO
Solid Red	Defined by GPIO
Off	Defined by GPIO

### HDD Activity

If this LED blinks, it indicates data access activities; otherwise, it remains off.

Blinking Amber	Data access activity
Off	No data access activity

#### Speed

Link Activity

### Link Activity

Blinking Amber	Link has been established and there is activity on this port	
Solid Amber	Link has been established and there is no activity on this port	
Off	No link is established	

#### Speed

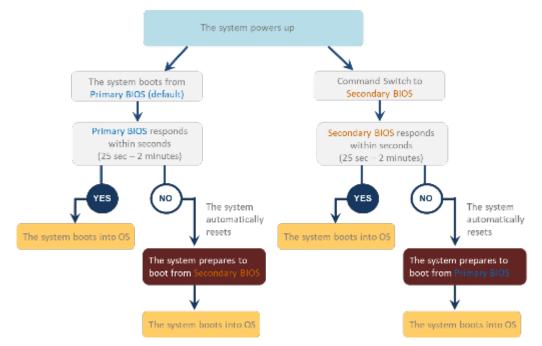

Solid Amber	Operating as a Gigabit connection (1000 Mbps)
Solid Green	Operating as a 100-Mbps connection
Off	Operating as a 10-Mbps connection

# **APPENDIX B: DUAL BIOS INTRODUCTION**

Failure when booting up BIOS is not uncommon and can occur most often during a power failure, a mishandled BIOS update, a malware attack resulting in data corruption. When it happens, recovering procedures consume considerable time and effort. Lanner understands this pain and have empowered our products with the Dual BIOS feature.

### **How Dual BIOS Works**

Dual BIOS features two physical BIOS ROMs soldered onto the motherboard, carrying two separate BIOS images. If the Primary BIOS (default) is not functioning correctly and fails to respond within seconds (~25 seconds to 2 minutes, depend upon appliance), the system will invoke a bootup from the Secondary BIOS, automatically restarting the system and launch the operating system.

### **2nd Gen Dual BIOS**

To provide increased flexibility and usage protection, Lanner has released the 2nd Gen Dual BIOS function on Lanner appliances. With 2nd Gen Dual BIOS, both the primary BIOS and secondary BIOS can be updated and flashed using the BIOS Tool to run different versions of BIOS ROMS independently for maximum compatibility. This additionally allow users to switch BIOS ROMS for booting up, toggling between primary BIOS and secondary BIOS.

### • Flexible recovery timer control

Users can designate the amount of time before recovery BIOS launch. The amount of time is no longer fixed to 7 minutes.

### • Flexible Dual BIOS ROMs control.

Users can flash both the Primary BIOS and Secondary BIOS, thus run different versions of BIOS ROMS independently for maximum compatibility.

### • Flexible Dual BIOS ROMs switch

The 2nd Gen Dual BIOS allow users to choose one of the BIOS ROMS (Primary BIOS/Secondary BIOS) for booting up. Use software command prompt to toggle between Primary BIOS and Secondary BIOS.

	Gen1 Dual BIOS	Gen2 Dual BIOS
Function	Primary / Recovery 2 <sup>ND</sup> BIOS for recovery purpose	Primary / Secondary (Peer to Peer) Both BIOS can let the system work
Detection Time	7 min	Seconds (By platform design)
2 <sup>nd</sup> BIOS updated	Only using the SPI facility	By BIOS tool command or SPI facility
MAC/DMI	Only for BIOS1	For both BIOS
CPLD Interface	GPIO	LPC or eSPI (By Platform)

Figure 1. Gen 1 vs Gen 2 Dual BIOS comparison chart

Few things can shut down a computer as completely as a corrupted BIOS. With Dual BIOS feature, you will be guaranteed to enter a healthy OS to perform thorough troubleshooting before the situation is irreparable.

### **Get Ready for BIOS Update**

Flashing a BIOS needs to be carefully completed, especially pertaining to a corrupted BIOS, which can lead to an unusable system if done incorrectly. To get ready for a BIOS update, acquire the following BIOS resources from Lanner technical support:

- Firmware and Flash Tool
- BIOS Engineering Spec

Before you start, make sure you select the correct firmware version, correct BIOS (Primary or Secondary) and go through the instructions for BIOS update in *BIOS Engineering Spec* thoroughly. If you cannot be certain if this version is correct for your system, please contact Lanner Technical Support.

#### Note:

- 1. Dual BIOS feature cannot work with BIOS Boot Guard function
- To update BIOS, it is mandatory to have both BIOS updated first. This is to avoid both BIOS having ME code variations, which could lead to unexpected risk and errors.
- When the system enters BIOS menu or Option ROM, the system will not reboot automatically.

## Warning

DO NOT power off or reset the system during BIOS updating process.

#### Disclaimer

Under no circumstances will Lanner accept responsibility or liability for damages of any kind whatsoever resulting or arising directly or indirectly from a BIOS update.

# **APPENDIX C: REDUNDANT POWER MODULE BEHAVIOR**

### **Define the Alarm and Mute behavior**

	Power Module	Power Module	Power Cord
	Fail	Remove	Remove
Buzzer	Alarm	Alarm	Alarm
	Change back the Good PSU Module	Put back the PSU Module	Plug-in the Power cord
Mute	or	or	or
	Press the Mute Button	Press the Mute Button	Press the Mute Button

### **Define the sequence of the Power Module**

PSU Sequence The detection is from the left to the right side , from the bottom to the top side

Example :

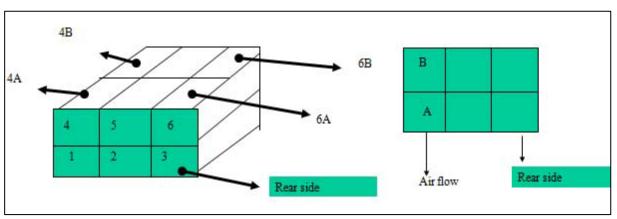

# **APPENDIX D: FAN SEQUENCE**

### **Define the sequence of the FAN**

FAN Sequence The detection is from the left to the right side , from the bottom to the top side

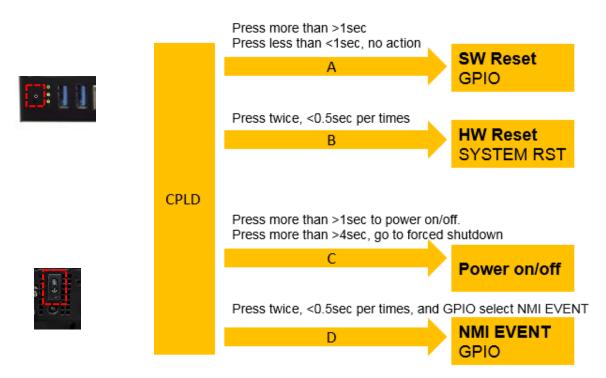

Example:

# **APPENDIX E: SMART POWER & RESET BUTTON**

### Smart Power and Reset Button – Control by CPLD

# **APPENDIX F: ESD/SURGE ENHANCEMENT**

Electrostatic Discharge (ESD):	Contact	Air	STD
IEC-61000-4-2	Discharge	Discharge	
Level 1	±2 kV	±2 kV	
Level 2	±4 kV	±4 kV	4K Contact (Default)
Level 3	±6 kV	±8 kV	8K Air (Default)
Level 4 (TBD)	±8 kV	±15 kV	
			STD
Surge Immunity (LAN)	Test Level		
IEC-61000-4-5			
Level 0	25V		
Level 1	500V		
Level 2	1kV		V (Default for Power DM (L to N) Line to Line V (Default for LAN CM (S to G) Line to Ground
Level 3 (TBD)	2kV		V (Default for Power CM (L to G, N to G, L+N to G) Line to Ground
Level 4	4kV		
			STD
Electrical Fast Transient (EFT):			
IEC-61000-4-4			
Level 1	0.5kV		V (Default for LAN)
Level 2	1kV		V (Default for Power)
Level 3 (TBD)	2kV		
Level 4	4kV		

# **APPENDIX G: TERMS AND CONDITIONS**

# **Warranty Policy**

- **1.** All products are under warranty against defects in materials and workmanship for a period of one year from the date of purchase.
- **2.** The buyer will bear the return freight charges for goods returned for repair within the warranty period; whereas the manufacturer will bear the after service freight charges for goods returned to the user.
- **3.** The buyer will pay for repair (for replaced components plus service time) and transportation charges (both ways) for items after the expiration of the warranty period.
- **4.** If the RMA Service Request Form does not meet the stated requirement as listed on "RMA Service", RMA goods will be returned at customer's expense.
- 5. The following conditions are excluded from this warranty:
  - ► Improper or inadequate maintenance by the customer
  - ► Unauthorized modification, misuse, or reversed engineering of the product
  - Operation outside of the environmental specifications for the product.

## **RMA Service**

### **Requesting an RMA#**

- **1.** To obtain an RMA number, simply fill out and fax the "RMA Request Form" to your supplier.
- **2.** The customer is required to fill out the problem code as listed. If your problem is not among the codes listed, please write the symptom description in the remarks box.
- 3. Ship the defective unit(s) on freight prepaid terms. Use the original packing materials when possible.
- **4.** Mark the RMA# clearly on the box.

**Note**: Customer is responsible for shipping damage(s) resulting from inadequate/loose packing of the defective unit(s). All RMA# are valid for 30 days only; RMA goods received after the effective RMA# period will be rejected.

## **RMA Service Request Form**

When requesting RMA service, please fill out the following form. Without this form enclosed, your RMA cannot be processed.

RMA N	0:		Reasons to Return:	
Compa	any:	Contact Person:		
Phone	No.	Purchased Date:	:
